

Sustainability Policy Statement

Solucore is committed to corporate sustainability, not only in our own operations but in the services we provide to our valued clients. Equally important is our commitment to sustainability in the communities in which we operate.

BECAUSE WE CARE ABOUT SUSTAINABILITY, WE ADHERE TO THE FOLLOWING PRINCIPLES:

OURSELVES

- ④ We will investigate and measure the environmental footprint of our operations and reduce our land, water and air impacts by outsourcing non-core processes and tasks;
- ④ We will continually improve our environmental performance emphasizing prevention of pollution and the efficient use of resources;
- ④ We will employ sustainable purchasing practices whenever feasible that address ongoing consumables and durable goods. We will work with partners and key firms to reduce duplication of work;
- ④ We will continue to conduct regular training sessions, to inform our team members of their responsibilities for environmental compliance, sustainability, and management;
- ④ We will continue to foster an environment of continual improvement by conducting periodic evaluations of our existing Environmental Management Systems.

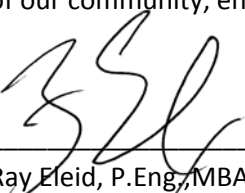

OUR CLIENTS

- ④ In cooperation with our clients, we will work together to improve existing environmental practices, policies and procedures;
- ④ We will strive to incorporate leading edge web based technologies and practices into our business in an effort to make our clients;
- ④ We will strive to become completely paperless and give our valued clients their documents electronically.

OUR COMMUNITY

- ④ We will support corporate citizens and partner organizations which promote sustainability.

We commit to these policies not because it makes business sense, but because we care about the health of our community, environment and our children.
